

MOHIT SHARMA

SOFTWARE DEVELOPMENT ENGINEER | JAVASCRIPT | PYTHON | SQL | LINUX

+91-7597564106 | mohitsharma099999@gmail.com | Aurangabad, Bihar, India

PROFESSIONAL SUMMARY

Software Development Engineer with hands-on experience in full-stack web development, REST API architecture, and asynchronous JavaScript execution. Proven track record of delivering high-quality web applications at Upwork, focusing on modular design, responsive UI, database modeling, and optimized code execution. Passionate about building performant scalable applications using JavaScript (ES6+), Python, SQL, and Linux systems.

WORK EXPERIENCE

Software Developer | Upwork

August 2025 – Present

- Architected, developed, and deployed full-stack web applications and scalable software solutions using JavaScript (ES6+), Python, SQL, and RESTful web services.
- Engineered dynamic, cross-browser frontend applications leveraging HTML5, CSS3, DOM updates, and asynchronous browser APIs (fetch/async-await) to maximize UI responsiveness.
- Designed robust backend architecture, relational database schemas, and persistent storage layers using SQL joins, data validation, and optimized CRUD queries.
- Collaborated with global engineering and business stakeholders to translate complex requirements into clean, maintainable, and well-tested code.

SOFTWARE DEVELOPMENT PROJECTS

Task Management Web App | JavaScript / HTML / CSS / REST API [\[GitHub Link\]](#)

- Built a responsive task-management application with task creation, editing, status tracking, search, filtering, modular JS, async API integrations, and error handling.

Expense Tracker | JavaScript / HTML / CSS / LocalStorage [\[GitHub Link\]](#)

- Engineered a personal financial tracker featuring income/expense categorization, date filters, monthly summaries, form validation, and persistent browser storage.

Weather Dashboard | JavaScript / REST API [\[GitHub Link\]](#)

- Created a real-time weather dashboard fetching live external APIs, managing asynchronous data flow, handling API failures, and rendering dynamic forecast data.

File Integrity Monitor | Python / Linux

- Developed a security utility hashing files, storing baseline checksums, and detecting file modifications or unauthorized state changes using filesystem APIs.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), Python, SQL, C++
Frontend:	HTML5, CSS3, DOM manipulation, responsive design, browser APIs
JavaScript:	ES6+, async/await, Promises, fetch API, JSON, modules, event handling
Backend & APIs:	REST API fundamentals, HTTP/HTTPS, JSON, authentication, CRUD, testing
Databases:	SQL, relational concepts, schema design, CRUD, joins, indexing fundamentals
CS Fundamentals:	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, SDLC
Systems & Tools:	Linux, command line, Git, GitHub, VS Code, Postman

EDUCATION

Ghani Khan Choudhary Institute of Engineering and Technology (under MAKAUT), Malda, WB

2020 – 2025

B.Tech, Electrical Engineering | CGPA: 7.87

BL Indo Align Public School, Aurangabad, Bihar

2017 – 2019

Higher Secondary Education | 67%

DEVELOPMENT FOCUS & STRENGTHS

JavaScript web development • REST APIs • Frontend engineering • Backend fundamentals • Database-driven applications • Linux development • Git/GitHub • Code optimization
